DATA ANALYST & DEVELOPER

Data analyst with a technical degree in **Data Science** and a degree in Systems Analysis and Development. At TRE-DF (Regional Electoral Court), I extracted data with **SQL**, wrote **Python scripts** that automated repetitive tasks, and prepared **reports for managers**. In the NovaCasa case study, I analyzed **603 employee departures**, found that **48% happened within the first 90 days**, and built a Power BI dashboard. Founder of E-Habilita, a platform published in beta.

CORE SKILLS

SQL

Python (Pandas, NumPy)

Power BI | DAX

Power Query

Excel

Exploratory analysis

Data extraction and cleaning

Data modeling

REST APIs

EXPERIENCE

TRE-DF (Regional Electoral Court of the Federal District)

Feb 2024 - Sep 2025

IT, Support, and Development Intern | Brasília, on-site

- Extracted data from the court's systems with **SQL queries** for analyses and reports.
- Wrote **Python scripts** to automate repetitive data collection and cleaning tasks, saving the team time.
- Prepared **reports for managers** and cleaned data in **Excel** spreadsheets.
- Provided user support and maintained internal systems, under confidentiality rules for election-process systems.

E-Habilita

Jan 2024 - Present

Founder & Developer (Data and Product) | driving-instructor marketplace | published in beta | e-habilita.com.br

- Designed the **PostgreSQL database (12+ tables)** and the API integrations that power the platform.
- Implemented **MercadoPago payments**, GPS tracking for driving lessons, and facial verification with TensorFlow.js.

2 Pulos

Aug 2026 - Present

Co-Founder & Developer | digital product studio | remote | 2pulos.com

- Co-founded the studio and built its website from scratch: visual identity, copy, and code using Next.js 16, TypeScript, and Tailwind.

PROJECTS

People Analytics Case - NovaCasa

Python | Pandas | Power BI | DAX

Exploratory analysis of **603 employee departures** at a retail chain: data cleaning in Python, tenure bands, and a retention curve. Result: **48% of departures within the first 90 days** (average tenure of 371 days), with a 5-view Power BI dashboard and recommended actions.
github.com/deyv7/Case-People-Analytics-NovaCasa

Libaccess

Python | Tkinter | Pillow | SpeechRecognition

Desktop app that converts text and speech into LIBRAS (Brazilian Sign Language) sign images. github.com/deyv7/Libaccess

EDUCATION

Systems Analysis and Development (Associate) | Centro Universitário IESB

Apr 2023 - Sep 2025

Technical Program in Data Science | Escola do Futuro de Goiás (EFG, managed by UFG)

Aug 2024 - Aug 2025

TECHNOLOGIES

Languages and analysis: SQL | Python (Pandas, NumPy) | R | TypeScript | JavaScript
Databases: PostgreSQL | SQL Server | MySQL | MongoDB | Supabase **Data and BI:** Power BI | DAX | Power Query | Excel | ETL | Databricks
Tools: Git | GitHub Actions | Docker | FastAPI | Claude | ChatGPT **Certification:** Introduction to Data Science (Cisco, 2024)
Languages: Portuguese (native) | English (intermediate, technical reading and meetings)
